

Single-Visit Dentistry
with the highest
hygiene standards

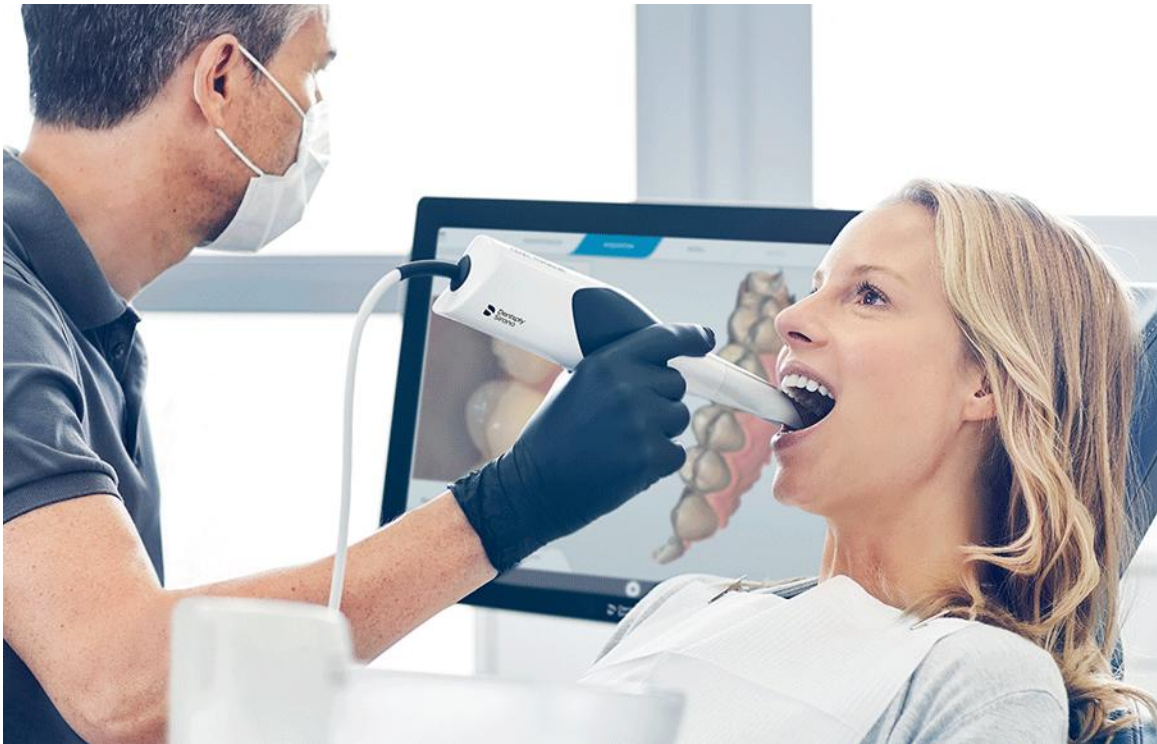

Enjoy convenience and peace of mind with digital dentistry

The fastest way to a beautiful smile

How it works

CEREC technology delivers a seamless dental experience in four simple steps.

1

Digital impression

We capture an image of the area to be treated with an intraoral scanner.

The fastest way to a beautiful smile

How it works

CEREC technology delivers a seamless dental experience in four simple steps.

2

Tooth design in 3D

A 3D model of your teeth and your new restoration are immediately created on the computer by your Dental Surgeon.

The fastest way to a beautiful smile

How it works

CEREC technology delivers a seamless dental experience in four simple steps.

3

In-house production

The restoration is then quickly milled from a ceramic or zirconia block directly in the clinic, matching the shade of your teeth.

The fastest way to a beautiful smile

How it works

CEREC technology delivers a seamless dental experience in four simple steps.

4

Placement

We place your custom-fit restoration, during the same day.

Hygiene benefits with Single-Visit Dentistry

Made by CEREC

Feel safe with digital dentistry and enjoy maximum convenience

Intraoral scanning offers maximum hygiene standards

Biting on unpleasant traditional impression materials could increase the risk of infection. With digital impressions made by CEREC you will experience a comfortable scan of your teeth under one minute. Various disinfection options not only eliminates the risk of crosscontamination but also keeps intraoral scanning safe.

Hygiene benefits with Single-Visit Dentistry

Made by CEREC

Feel safe with digital dentistry and enjoy maximum convenience

Time-saving treatment with long-term stability

Every step of the treatment will be done in a single day. With CEREC you can avoid the need for temporaries and instead benefit from highly esthetic and high-quality restorations with no follow-up appointment.
